

Please replace this doc with a **PDF of your UML design**. If you used a drag-and-drop offline tool like [UMLet](#), you may also include your UMLet source file in this folder for your own convenience.

Alternately, there are online tools like plantUML (From a google doc, choose add-ons > get add-ons > search for plantUML and install it.) If you use that, feel free to also include a text file with a link to your online google doc with the source, again for your own convenience. But we'd still like **the PDF too**.
